

We have started reproducing American Windsor Chairs in India.

Prakash Suthar Windsor Chairs.

Traditionally Handcrafted Windsor Chairs and Furniture.

A communiqué of history. An icon of quality.

Windsor Chairs: Stick – and – socket framed plank seat furniture.

The inspiration is drawn from American Windsor Furniture of late seventeen, eighteen and nineteenth century furniture. History says Windsor chairs were developed in the late 17th or early 18th century in the vicinity of Windsor, England.

Our handcrafted Windsor chair is an articulation of authenticity, elegance, and durability. With our close attention to detail and careful construction, each chair is flexible, accommodating, and very comfortable.

Our Windsor Chairs were displayed at American Hardwood exhibition at Bangalore. AHEC member exhibitors have displayed the chairs and discussed about the value and worth of American Hardwoods. They are truly a wonderful species to work for the furniture.

I will keep posting on the Wonderful Species – American Hardwood and the Windsor Chairs everyday.
